

Instruction Manual

SL-RGB5LO

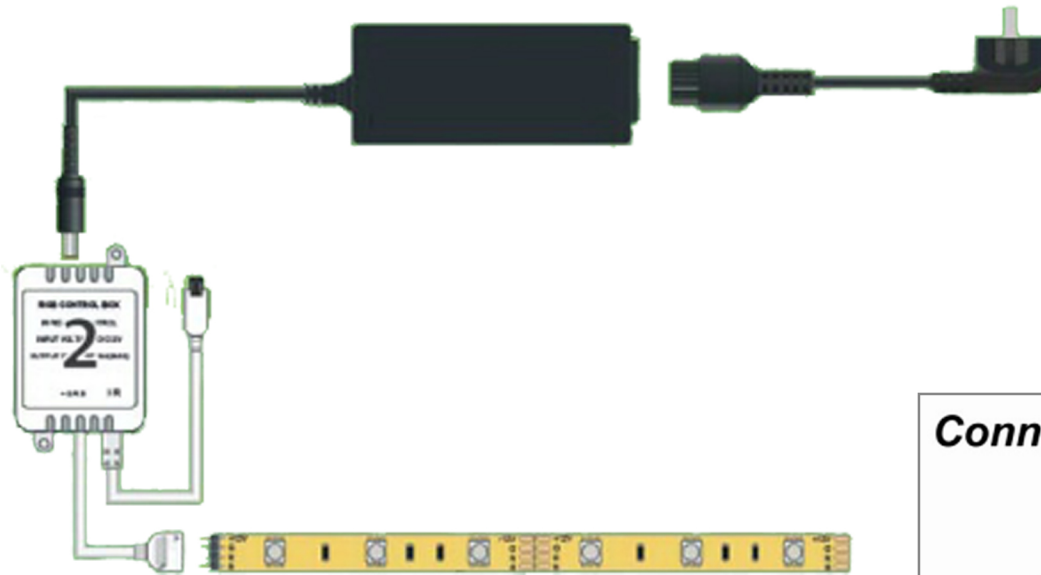

Projects Including garden lights, porches and patio areas.

This low-voltage color changing LED lighting strip produces little heat, which makes the strip safe to touch.

ORTECH's striplight is easy to connect to a RGB LED controller.

The strip can be cut at various lengths and include: 3M Tape for mounting which makes it perfect fit for customized installations. The remote control allows you to choose the color, set the brightness to one of 4 levels and select from 4 modes: Flash, strobe, Fade, and smooth.
